

Linda Street Monitoring Station

2009

Located at 8825 North Linda Street in Pahrump, this PM₁₀ site is on the premises of a private residence. The continuous beta attenuation monitor is sited on the roof of an old railroad box car. This location is the most rural and northern-most site in the Pahrump Valley monitoring network. There are some residential plats surrounding this site, but the area mainly consists of native desert vegetation with little or no land surface disturbances. There are gravel roads in the area, but they experience little traffic. PM₁₀ monitoring commenced in May 2003.
